

TASSTA COOPERATION

PTT SOLUTION FOR SPECIAL APPLICATIONS

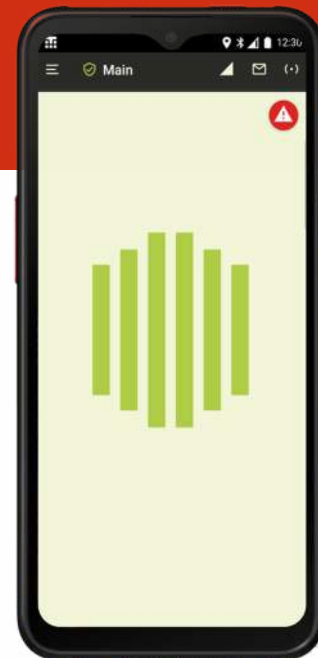

TASSTA offers a professional Push-to-Talk (PTT) solution which uses all technical capacities of SAMSUNG Smartphones. The T.Flex application and special hardware operational buttons on the SAMSUNG devices are able to provide the best possible safety for an everyday operation.

TASSTA app (T.Flex) which is installed on the SAMSUNG devices makes it possible to organize a professional PTT communication platform in hazardous environments (e.g. oil and gas plants, chemical plants, mining, etc.).

TASSTA extends capabilities and allows users to operate on cellular networks around the world. It works over LAN, WiFi or/and any mobile network (e.g. 3G, LTE) while allowing users a maximum connectivity.

TASSTA is a partner of Vodafone. Vodafone is one of the leading communication companies. In Germany, every second person is a customer of Vodafone – using the internet, making a phone call or watching TV. Even offices, farms and factories are connected by Vodafone technology.

In cooperation with **TASSTA**, the Vodafone Global IoT provides a broad range of features that makes your communication more efficient and secure, and your work much safer.

THE BEST POSSIBLE SAFETY FOR AN EVERYDAY OPERATION

- **Ambience Listening**
- **Mandown & Lone Worker Protection (LWP)**
- **Issue Management by QR-code, Barcode, NFC**
- **Individual-, Group-, Priority and Video Calls**
- **Dynamic Group**
- **GPS- and In-house Tracking**
- **Map and Geozones**
- **Fast Call Setup**
- **Security/Encryption**
- **Remote Camera Control**
- **Task Management System**
- **External Devices and Accessories.**
- **Emergency Call and Emergency Alert**
- **Messages and Data Transferring**
- **Voice Recording and Replay**
- **Critical Communication**
- **Individualization**
- **Network Coverage**

SECTORS / INDUSTRIES

Industries that need Hazardous Certified Devices

Over 60% of manufacturers have the need for an intrinsically safe device including oil & gas, chemical and pharmaceutical industries, but also textile, cosmetic, aerospace, automotive, food, agricultural, mining and munitions industries - just to name a few.

TASSTA & VODAFONE

2G /3G / LTE / WIFI & SATELLITE
DMR, P25, TETRA

T.FLEX

Application running on portable devices, smartphones, tablets and laptops.

T.RODON

Command and Control Center Solution. It Can be organized as a Desktop Application or be running on the field in mobile environments.

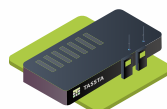

T.LION

Communications server - the main component of the TASSTA network. Available as standalone or /and cloud solution.

T.COMMANDER

Web-based application to control resources and services on TASSTA Servers.

T.BRIDGE

Professional middleware solution interconnecting TASSTA and PMR Networks.
