VIDEO
COMMUNICATION

- Secure streaming and storage of video information
- Specialized video format tailored for communication archival
- Interoperability with other services and systems

- All recording features are available in combination with T.Recorder
- Remote video

PUSH-TO-VIDEO

The familiar push-to-talk behavior is enriched with a video feed. Video calls blend into the feature set perfectly.
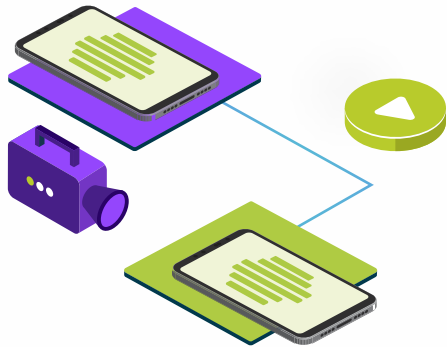

CLIENT SUPPORT

Use video to communicate with other TASSTA network users no matter what type of client they use: T.Flex or T.Rodon.
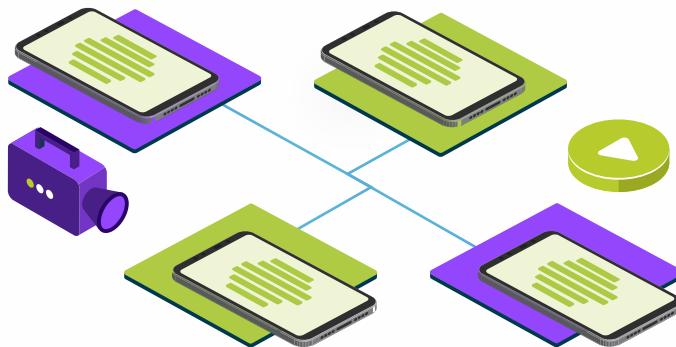

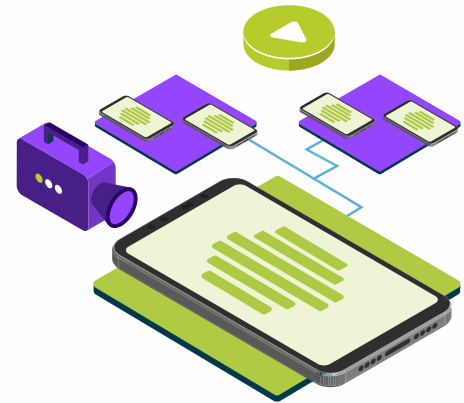

CONFIGURABILITY

T.Commander gives the administrator a range of options for managing video quality per user. This helps provide video features even on slow networks.
