

T.RECORDER

Advanced voice, data and call recording

T.Recorder is a smart, reliable and easy-to-use TASSTA software solution for secure recording, rapid voice replaying and data communications within TASSTA Network. It is designed to help organizations keep the records and enhance their mission-critical responses.

T.Recorder provides a great set of tools to sort, search and replay voice records, view message history and monitor user activity in the channels. Furthermore, T.Recorder grants the ability to analyze user movements based on the GPS location history.

In order to keep data secure, all the data and voice records are separately stored on the TASSTA server. However, the T.Recorder gives you the opportunity to backup all voice communication on a local drive.

T.Recorder is designed to be a user-friendly application and grants the possibility to easily navigate through the software's GUI. The software is set up to make monitoring and collecting data easy for anyone to use, you do not have to be tech savvy. Everyone will benefit from it, as it is designed to suit all consumer's needs with ease.

KEY FEATURES

■ Name changing

View the history of login changes. Allows to keep tracking of what point in time the user data has been modified.

■ Connection status

View login history of the TASSTA clients - T.Flex or T.Rodon. Allows to know the exact time of user's login and logout.

■ GPS recording

An operator can quickly access the movement history and keep tracking the selected T.Flex user. The coordinates are displayed with reference to the time of change. T.Recorder has the ability to export popular GPS data formats, such as CSV, and importing data into the mapping software, such as Google Earth or any other similar software, to create a 2D virtual artwork on a large scale.

■ Channel changing

View the user's movements through the channels. Allows to track the user's actions, the titles and time of the visited channels.

■ Individual & group call recording

T.Recorder Users can track and export every individual and group call to the computer. Call data, time, duration, channel data, login and alias are also available. This data can be provided by both, calling user and accepting user.

■ Message recording

View data of all written communication on a server. T.Recorder users can view the sender and recipient information, as well as read the text of each message. All emergency messages are highlighted with red to quickly evaluate a severity status. It is possible to export the text message or transferred file to a local drive.

■ Emergency calls recording

With the function of tracking and recording every emergency call, all the emergency calls can be examined for compliance with applicable procedures in critical situations. The data for each call with the possibility to export it, will be displayed.

■ Data export

With T.Recorder, you have the ability to export all data in CSV format and download the recordings in .wav file format.
